Subject: Oct meeting follow-up

Greetings! This is a **follow up** to the October meeting HEALTH, NUTRITION, DIET Support & Accountability Team www.maxfulfillment.com/sundayhealth/.

Thanks to all of you who came. I am excited about the discussion that we had, and that we have a **core, nucleus or start of a “village”** to raise our health, nutrition, diet to what we want, need it to be. I added ones to the email that could not attend, but wanted to. People can be added anytime. See 6 below.

1 Anything missing or that you would add, change or correct in the **October meeting notes** below. The meeting, discussion, input continues.

2 As you look at the **Questionnaire** www.maxfulfillment.com/sundayhealthquestionnaire/, answer any of the questions you haven't answered or provided input on

3 What are one or two **takeaways** from the meeting; something you liked, learned or realized?

4 As a result of the meeting, what is one **change, improvement or break-through** you want, need to make, and

5 How will you do it utilizing, drawing upon 1 or 2 **powerful, effective, best-practice change agents** like these that produce **real, significant change**:

a Food, drink, diet tracking, chart and diary/journal [Food-diary vertex](#);

b Action plan www.maxfulfillment.com/sundayhealthactionplan/;

c Affirmations, visualizations;

d Deep breathing, breath techniques;

e 5 whys, root cause analysis;

f Need, gap analysis and closure;

g Spiritual incubation;

h Inner power manifestation/actualization;

i Another, other you would add.

(Just what the HEALTH, NUTRITION, DIET Support & Accountability Team is all about and distinguishes it. However, it doesn't mean you have to change and use change agents in order to participate).

6 Who else would you add to the Team that want, need their health, nutrition, diet changed, strengthened or improved, and who could be a key part of your support and accountability.

Have them **complete the Questionnaire** www.maxfulfillment.com/sundayhealthquestionnaire/ so the HEALTH, NUTRITION, DIET Support & Accountability Team can serve them, be what they need as well.

Because we are just starting out and wanting to avoid overwhelm or be too much, I am thinking or **proposing to first focus on and complete 1-4**, and then look at and tackle 5. 6 is something that is a given and constant, ongoing.

Note the reason why it's important to completely finish 1 Notes and 2 Questionnaire input. They determine and drive, or are the basis, foundation for the agenda, panel, what happens in the meetings and the ongoing discussion, support and accountability in between.

Likewise, 3 and 4 are about what you want to learn, know, and change, strengthen or improve the most.

Reply all and share, say, contribute whatever you would like.

You can also contact me, Randy 847 809-4821, randy@maxfulfillment.com with any questions, requests; input, ideas or suggestions.

NOTES FROM THE OCTOBER MEETING

Anything missing; you would add, change or correct. The meeting, discussion, input continues.

MEETING, ONGOING DISCUSSION, SUPPORT AND ACCOUNTABILITY

1 Meet once a month

2 Check in once a week--something positive; what are you changing or improving; questions you have; support, assistance that would be helpful
